Location: Algeria

Plant Type: Desalination Plant

End User: AEC - Algerian Energy Company

The project involves construction of a reverse osmosis desalination plant located in Wilaya de Tipaza, a few kilometers west of Algiers. The water produced by the plant supplies the Tipaza area and the western part of Algiers through existing networks. The desalination plant guarantees water supply to a population of 800,000 inhabitants.

The catchment of sea water is carried out through the open intake system. The pre-treatment includes sand and cartridge filtration, as well as chemical dosages.
